PROJECT EXPEREINCE

WYWOA CRM
PHP, Laravel, Vue.js, Livewire, JavaScript, SQL

Developed a comprehensive lead management system for visa consultation companies using Laravel. The platform streamlines lead capture from multiple sources (websites, Facebook, direct), supports consultant-client chat, appointment scheduling, and lead progression. Features include financial management (invoices, receipts, payments, refunds), operational tools (agreement generation, document handling), and a dedicated client portal for case tracking, chatting, and secure interactions. The system also offers a B2B module for partner lead management, advanced reporting for managers, region and branch management, HR integration, user privilege controls, device authentication, and employee activity tracking. Designed as a secure, scalable, and reusable solution tailored for the visa consultation industry.

Abroad Routes
WordPress, integrated with WYWOA CRM

Digital solution for a visa consulting company, fully integrated with WYWOA CRM. The platform streamlines client management, documentation, and communication, supporting efficient visa application processing and compliance with immigration regulations. Designed to enhance operational efficiency and deliver a seamless experience for both consultants and clients.

Feather Learn Online Courses System
PHP, Laravel, Livewire, JavaScript, SQL

Online learning platform enabling admins to create and organize pre-recorded courses by module and lesson. Users can preview course content, purchase full access, and learn at their own pace. The system features integrated exams and automated certificate generation, supporting flexible learning for students and streamlined, revenue-generating operations for companies.

Projects in ECOM Services Lanka (Pvt) Ltd
PHP, Laravel, Livewire, JavaScript, JQuery, SQL, Shopify

I have worked on several projects in ECOM Services Lanka (Pvt) Ltd in Colombo. Its main project is maintaining the Unilever online store system in Sri Lanka[uStore.lk]. Its included more than a thousand products. Backend development and maintenance was handled by me and I was responsible for that during the respective tenure. In additionaly I worked Dilmah Tea backend, Cool Planet backend as other main projects. Financial and accounting, Report management, Customer management, B2B Customer management, Inventory management, Job management, and Shopify are the main areas in this job roll.

Tech Trax
PHP, JavaScript, jQuery, SQL

Developed a web-based solution to streamline the management and support of desktop, laptop, computer accessories, networking, and CCTV services. The platform enables efficient tracking, issue resolution, and service coordination, helping businesses improve IT asset management and technical support operations.

Nazzpanache Restaurants
PHP, JavaScript, jQuery, SQL

Web-based solution for restaurant and homemade food product businesses. The system streamlines menu management, order processing, and inventory tracking, while supporting both dine-in and delivery operations. It offers user-friendly interfaces for staff and customers, integrates payment processing, and provides analytics for business insights. Designed to help food businesses efficiently manage daily operations and enhance customer experience

Nitra Technology
PHP, JavaScript, jQuery, SQL

Web platform for managing technology products and accessories, with integrated web and mobile app development services to streamline product management and customer support for tech businesses.

Safety First Medical Service
PHP, Laravel, JavaScript, jQuery, SQL

Developed a digital platform for a medical company offering courses, products, and appraisals. The system enables efficient course management, product cataloging, and appraisal services, supporting both healthcare professionals and clients. Designed to streamline operations, enhance user experience, and drive business growth in the medical sector.

Alpha Reloaded
PHP, Laravel, JavaScript, jQuery, SQL

Developed a web solution for an event management company to streamline event planning, scheduling, and client coordination. The platform improves operational efficiency and enhances communication between organizers and clients, supporting successful event execution.

Project in Transglobal Investments Company (Pvt) Ltd
PHP, Laravel, JavaScript, jQuery, SQL

I have worked on this project in Virtual System Solutions (Pvt) Ltd Anuradhapura. This system develops fully customized applications for clients to cover every part of the business process. I reported to Mr. Harshan Maduranga [Tech Lead] on this project. Financial and accounting, Customer management, Inventory management, Job management, and Dealer management systems are the main areas in this system.

GeoHaul Transport Service Project
Java, Spring Boot, Angular, MongoDB, SQL

I have worked on this project in Skylit Solution (Pvt) Ltd - Negombo. This system is a transport management system. I reported to Mr. Gayan Jeewaka [Tech Lead] on this project.
